Education

2024–Present **PhD in Computer Science, Theoretical Neuroscience**, *Yale University*, New Haven, CT
Focus on NeuroAI. Specifically, I develop new approaches to building and using AI models to learn the mechanisms underlying the dynamics in the Brain and LLMs. Adviser: Steven Zucker. Expected graduation: January 2028.

2020–2024 **BA Computer Science, BA Mathematics**, *Columbia University*, New York, NY
Columbia College, Graduated Cum Laude, GPA: 3.95

Relevant Experience

2024–Present **Graduate Research Assistant**, *Zucker Group*, New Haven, CT
Researching approaches to understanding network dynamics in AI and neuroscience by building generative models and leveraging tools from differential geometry and causal inference.

2022–2024 **Mathematical Biology Researcher**, *Rabadan Lab, Columbia University*, New York, NY
Utilized mathematical tools from AI, Topology and Optimal Transport to work on problems in Genomics.

2022–2023 **Product Research and Management Intern**, *MathWorks*, Natick, MA
Built and tested proof-of-concept Deep Learning Transformer model to assess viability for a Deep Learning-based product offering. Researched and implemented a new algorithm for MATLAB Set Difference in C++, leading to substantial performance improvements for hundreds of MATLAB functions.

Publications

[1] **S. Kinger**, J. Bertram, L. Dyballa, T.A. Kellar and S. Zucker, "Reading Positional Coupling in Transformers with Diffusion Scores," *Fortieth Annual Conference on Neural Information Processing Systems (NeurIPS 2026)*, Sydney, Australia. Accepted, Publication forthcoming in December 2026.

[2] **S. Kinger**, J. Bertram, L. Dyballa, E. Yemini and S. Zucker, "Inferring Active Neural Circuits Using Diffusion Scores," *90th Cold Spring Harbor Laboratory Symposium on Quantitative Biology, May 2026*, Cold Spring Harbor, New York, poster. https://arxiv.org/abs/2605.02852

Fellowships

2024-2025 Nathan Hale Fellowship, Yale University

Invited Talks and Workshops

March 2026 Indian Institute of Technology (IIT) Delhi - Department of Computer Science, Title: Neural Circuit Discovery via Representation and Dynamics

November 2026 National Institute for Mathematical and Theoretical Biology, Chicago - Probabilistic Inference in Neuroscience. Title: Inferring Neural Circuits using Diffusion Models
